Do not use where water is micro biologically unsafe or with water that has not been disinfected in the prescribed and knowing manner. The water quality can differ from area to area in some instances one might require additional water purifying devices.

## Instruction For Use

1. Open the filter packing, wash the with tap water.

2. Dip the filter into water for about 20 minutes.

3. Wash the jug and filter holder thoroughly before use it.

Drain the first two glasses of water.

4. Insert the filter to the filter holder and gently press in.

5. Pour the required amount of cold tap water into the filling funnel.

## How to use "Mechanical Indicator

1. There are three kinds which are one person, two person and three person. You can choose the kind by your situation.

2. For example, one person use the water purifier pitcher which is starting from January 1st. Turn the mechanical indicator and make the one person's arrow point to JAN 1 in the back of the cover.

3. The front of the cover will show you the replace time of the filter.

### Attention :

1. If the date is not in the mechanical indicator in the back of the cover, please choose the latest date as starting date.
2. Do not dial the mechanical indicator before replace the filter.

## Useful Tips & Precautions

1. Water pitcher is only used for cold water.  
(Water source : Tap water)

**DO NOT FILL HOT WATER IN THE JUG.**  
(MAX 85 °F / 30 °C)

2. After draining out water from the pitcher, add more water right away to keep the filter cartridge wet. If the filter cartridge dries out, it may need to soak before being used. If the filter cartridge becomes too dried out, it is necessary to be replaced.
3. Allow water to filter completely before pouring or refilling reservoir.
4. Keep the filtered water refrigerated at all times. If no use of filtered water for three or four days, replace the unused water with fresh water.
5. All parts except the filter cartridge should be washed regularly. It is important to keep food and beverage equipment clean and sanitary.
6. **DO NOT USE DISHWASHER TO CLEAN PITCHER, RESERVOIR AND LID.**
