All in One

Water treatment System

Point of Entry Whole House Water treatment

Product Introduction

A specially designed POE(Point of Entry) Systems for modern homes and many places provides clean and safe water for all necessary needs from groundwater.

Advantages of POE System

Economic Solution of Drinking Water

POE System could be installed at schools, government offices, military camps, houses far from the city and farms to provide fine and drinkable water with reasonable costs instead of large plants which require much of expenses.

Easy Installation & Operation

POE System provides clean and safe water for all necessary needs from raw water by easy installation and operation in every places.

Suitable Places of Installation

Point-of-Entry Water treatment system for the purification of ground water

Vulnerable area of water supply where densely populated places far from metropolitan city.

Point-of-Entry Water treatment system of drinkable water for livestock

Some area where source water is seriously polluted due to lack of treatment system of sewage or leachate-contaminated caused by livestock infection.)

Why POE ?

Handling many problems caused by polluted ground water
Iron, Heavy Metals, Pathogenic Micro-organism, scale formation by lime, etc.

All in One Nano

Point of Entry Water treatment

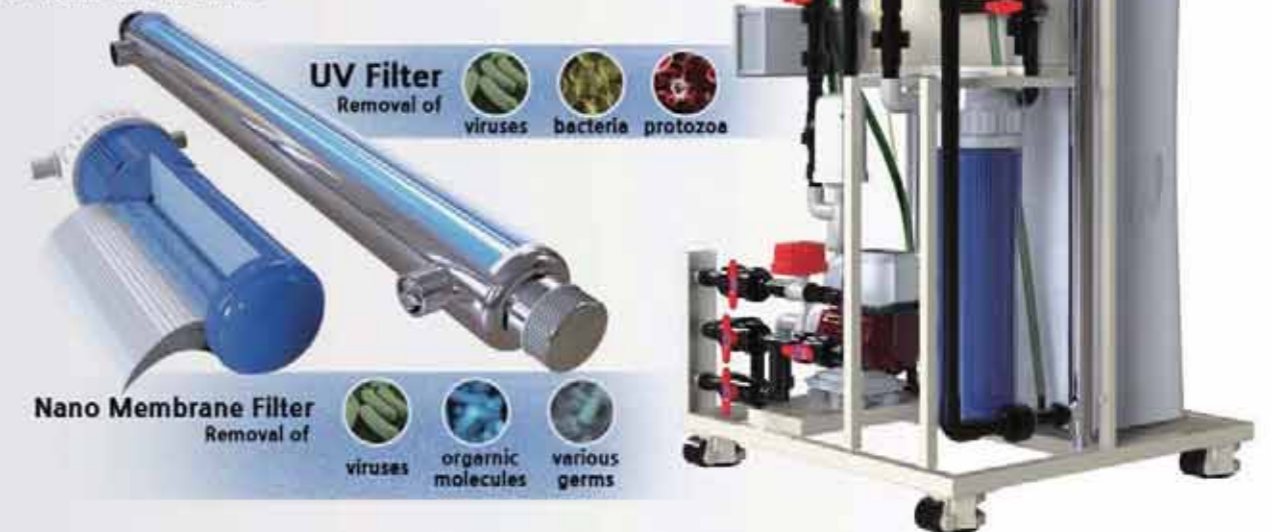

- Max. 5stage Nano or Eco Filtration System(Optional)
- Easy installation by Simple Structure in Small Place
- Max. 30ton produced in one day
- Automatic Control System
- Automatic Filter Cleaning
- Automatic operation by Inverter pump(option)
- UV Sterilization System(Optional)

Point of Entry Whole House Water treatment

The effective removal of pathogenic microorganism by Double Water Filtration System.

The applied Nano and UV filtration system on Whole House POE System eliminate pathogenic microorganism from feed water(ground water) so that provides clean and safe water for house uses and drink.

Effective Whole House Iron Reduction System

This system offers hassle-free maintenance as you blast away iron problems for your home. Insist on better water with the WACO Whole House Iron Reduction System.

Water Softening Systems for ground water

Water Softening Systems removes lime and heavy metals from feed water(ground water).

- Water Softening(By Ion Exchange Process)
- Water Softening(By Multi Media)

All in One RO Point of Entry Water treatment

- Max. 7stage Water Treatment System
- Easy to installation and Move by Simple Structure
- Max. 20ton produced in one day.
- Automatic Control System
- Automatic Filter Cleaning
- Smart Remote Control and Monitoring System(Optional)

The effective removal of pathogenic microorganism by Reverse Osmosis Water Filtration System.

The applied R/O(Reverse Osmosis) systems removes all pollutants especially in heavy metals, pathogenic microorganism from raw water(ground water) so that provides clean and pure water.

UV Filter
Removal of

viruses bacteria protozoa

RO Membrane Filter
Removal of

viruses organic molecules various germs

Point of Entry Whole House Water treatment

UF Membrane Filter
Removal of

viruses bacteria minute particles

Optional Smart UF Filter makes more clean and safe water for house uses and drink.

Optional Smart UF Filter could be applied at last stage of Whole House POE System by customer's choice and it guarantee more clean and safe water for house uses and drink by eliminating bacteria, viruses and minute particles once more.

Effective Whole House Iron Reduction System

This system offers hassle-free maintenance as you blast away iron problems for your home. Insist on better water with the WACO Whole House Iron Reduction System.

Water Softning Systems for ground water

Water Softning Systems removes lime and heavy metals from feed water(ground water).

- Water Softning(By Ion Exchange Process)
- Water Softning(By Multi Media)

All in One RO

Point of Entry Water treatment

- Max. 7stage Water Treatment System
- Easy Installation by Simple Structure in Small Place
- Max. 8ton produced in one day
- Automatic Control System
- Automatic Filter Cleaning
- Smart Remote Control and Monitoring System(Optional)

Optional Smart UF Filter makes more clean and safe water for house uses and drink.

Optional Smart UF Filter could be applied at last stage of Whole House POE System by customer's choice and it guarantee more clean and safe water for house uses and drink by eliminating bacterias, viruses and minute particles once more.

Point of Entry Whole House Water treatment

The effective removal of pathogenic microorganism by Reverse Osmosis Water Filtration System.

The applied R/O(Reverse Osmosis) systems removes all pollutants especially in heavy metals, pathogenic microorganism from raw water(ground water) so that provides clean and pure water.

Effective Whole House Iron Reduction System

This system offers hassle-free maintenance as you blast away iron problems for your home. Insist on better water with the WACO Whole House Iron Reduction System.

Water Softning Systems for ground water

Water Softning Systems removes lime and heavy metals from feed water(ground water).

- Water Softning(By Ion Exchange Process)
- Water Softning(By Multi Media)

Reverse Osmosis Water treatment

- The most compact Commercial R/O System / Space Saving with a small size / High Quality & Performance
- Applying a Control Panel / Water Quality Measurement / Checking Operation Status / Automatic off by HPS LPS Function
- Upgrade an existing Pre Filtration System like Water Softner by combination of Compact R/O System
- Applying an US Origin Procon Pump & Marathon Motor / High Capacity of Micro Filter / SUS Piping / LG Energy Saving R/O Membrane
- Easy Installation & Operation

Point of Entry Reverse Osmosis Water treatment

The effective removal of pathogenic microorganism by Reverse Osmosis Water Filtration System.

The applied R/O(Reverse Osmosis) systems removes all pollutants especially in heavy metals, pathogenic microorganism from raw water(ground water) so that provides clean and pure water.

Compact RO System

Compact Water treatment System

*20inch filter Housing
Bigger Capacity!*

600GPD RO
Commercial 5 or 6-Stage RO System 600GPD

900GPD RO
Commercial 5 or 6-Stage RO System 900GPD

300GPD RO
Commercial 6-Stage Stand type RO System 300GPD

ULTRA FILTRATION SYSTEM
Commercial 5 or 6-Stage UF System

Emergency Drink Water System

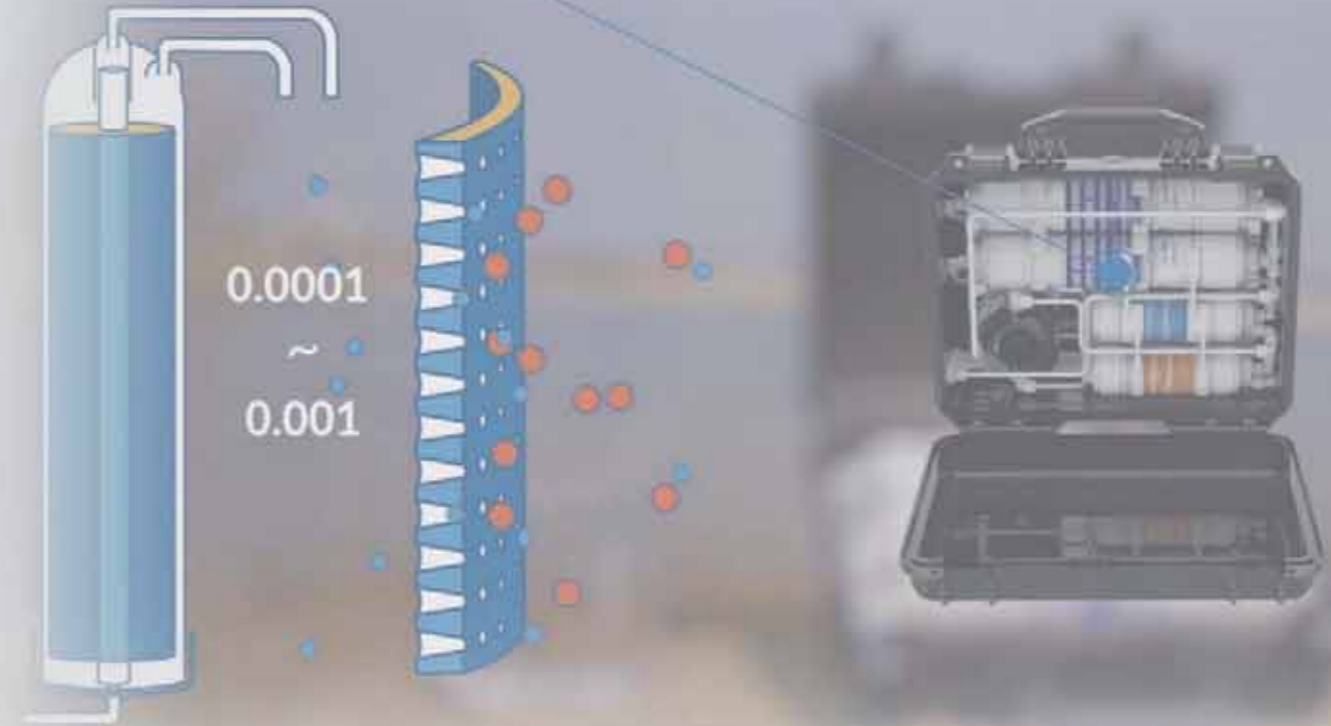

EMRO series

All in One RO Portable Water Purification system

REVERSE OSMOSIS

River & Lake

Emergency Drink Water System

Possible to Remove all contaminants of radioactive & NBC. (nuclear, biological and chemical)

It is very suitable for countermeasures against natural calamities and water supply during warfare.

Seawater Desalination System Sea & River

River & Lake

Non-powered Portable R/O Water Purification Equipment

- Purifies multiple water types, including River, Lake & Stream
- * Handle-powered equipment
- * Available of power supply by Cigar jack!
- * Dual Drive (Electric & Manual)

PATENT APPLICATION
No. 10-1266229
