Letter of Recommendation

Korea Environmental Industry and Technology Institute(KEITI) is a governmental entity under the Ministry of Environment to encourage the development of environmental technology and industry as well as the promotion of environmentally friendly products in Korea. In addition, KEITI commits itself to supporting the advancement of domestic corporates in the environmental busiess abroad.

HYUNDAI Wacor Tec. Co., Ltd.("the company") is the specialized environmental company that has accumulated various experiences in the field of water treatment at home and abroad. Especially, during the period of 2008 and 2009, the company successfully supplied and installed reverse osmosis water treatment systems at the 67 sites of Salyan and Nakhchivan provinces in Azerbaijan.

We are confident that the company's previous experiences could contribute to implementing Safe Drinking Water Project for Coahuila and Torreon province in Mexico. In this regards, we are very pleased to recommend the company to participate in the bidding of this project

We look forward to realizing mutual benefit from this project and hope to enhance bilateral cooperation for sustainable development and environmental protection.

Yours sincerely,

Seung-Joon Yoon
President

Korea Environmental Industry and Technology Institute
